MUKUNDAM ARAVIND

Frontend / Next.js Developer | React.js • Next.js • TypeScript

+91 9642629585 • mukundamaravind@gmail.com • LinkedIn • Portfolio • Hyderabad, India

PROFESSIONAL SUMMARY

Frontend Engineer with 5 years of experience building production-grade applications with React.js and Next.js, including hands-on work with the App Router, Server and Client Components, and SSR/CSR rendering patterns. Architected an end-to-end HRMS platform featuring JWT authentication, RBAC, geo-fencing, and biometric verification. Skilled in TypeScript, Redux Toolkit, REST API integration (Axios/Fetch), and Tailwind CSS, with a strong track record of converting Figma designs into responsive, SEO-optimized interfaces and shipping through CI/CD pipelines on Vercel. Comfortable owning the full frontend lifecycle independently across agile, startup, and enterprise environments.

TECHNICAL SKILLS

Core Languages & Frameworks: React.js, Next.js (App Router, Pages Router), TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS

Next.js & Rendering: Server Components, Client Components, SSR, CSR, SEO Metadata Management, Image Optimization

State Management: Redux Toolkit, React Context API

UI & Styling: Tailwind CSS, ShadcnUI, Bootstrap, Flexbox, CSS Grid, Responsive Design, Figma

API Integration: REST APIs, Axios, Fetch API, Asynchronous Programming, Postman, API Contract Validation

Authentication & Security: JWT, OTP, OAuth, Role-Based Access Control (RBAC), Clerk

Data Visualization: Chart.js, Recharts, Time-Series, Pie, Bar, Doughnut Charts

Backend & Databases: Node.js, Express.js, MongoDB, MySQL, Spring Boot (API integration)

Tools & Platforms: Git, GitHub, npm/Yarn, Netlify, CI/CD Pipelines, Supabase, NeonDB, Browser DevTools, AWS EC2, S3 bucket

Dev Practices: Agile/Scrum, Performance Optimization, Root Cause Analysis, Code Review

PROFESSIONAL EXPERIENCE

Frontend Developer | *WalkoutTech — Hyderabad* **Sep 2025 – Aug 2026S**

- Architected a production-grade HRMS web application from scratch using React.js, serving as the sole frontend owner on a startup product team
- Engineered a multi-layered security system with OTP authentication, JWT-based API authorization, and RBAC for Employee, Manager, and Admin personas
- Integrated biometric face verification and geo-fencing logic to eliminate proxy attendance and enforce location-based Punch-In/Punch-Out access
- Designed and maintained global application state using Redux Toolkit across auth flows, user roles, attendance tracking, and async API lifecycle using Axios
- Built interactive HR analytics dashboards with Chart.js incorporating Pie, Doughnut, Bar, and Time-Series visualisations
- Converted Figma mock-ups into pixel-perfect, responsive interfaces using Tailwind CSS and CSS Grid/Flexbox, ensuring cross-device consistency
- Integrated frontend with Spring Boot REST APIs backed by MySQL; collaborated with backend team to define and validate API contracts via Postman

Software Engineer | *CREXIN Technologies — Hyderabad* **Jan 2023 – Sep 2025**

- Led UI development team in migrating the Candidate Evaluation Portal to a modern React.js architecture, improving maintainability and scalability
- Owned implementation of role-based authentication, user management, and course evaluation modules using Redux and Bootstrap
- Contributed to BestBudget personal finance application — built OTP login, JWT-secured API flows, and Chart.js data visualisation dashboards
- Implemented SEO optimisations and metadata improvements, and integrated Google Analytics on the company landing site, improving search discoverability
- Designed UI/UX wireframes in Figma and translated them into responsive, production-ready React components

Software Engineer | *SpanIdea Systems — Pune* **Jun 2021 – Jan 2023**

- Developed and maintained frontend modules for TSS (The Souled Store) Backoffice admin panel using React.js, jQuery, and Bootstrap
- Implemented dynamic listing pages with full CRUD functionality, integrating data exchange between frontend and backend via AJAX
- Diagnosed and resolved UI defects through structured Root Cause Analysis and browser DevTools debugging, reducing recurring production bugs
- Collaborated with geographically distributed teams to deliver features aligned with client timelines and requirements

Frontend Developer Intern | *YAV Technologies (Sharpener) — Bangalore* **Jul 2020 – Feb 2021**

- Contributed to frontend development using ReactJS, HTML5, and CSS3, building reusable UI components and integrating REST APIs
- Supported implementation of OTP-based authentication and JWT-secured flows under senior developer guidance

KEY PROJECTS

HRMS Web Application — WalkoutTech

- Architected full-featured HRMS platform from scratch; sole frontend owner across a multi-role enterprise application serving internal employees
- Secured the application with OTP auth, JWT authorisation, RBAC workflows, biometric face verification, and geofencing
- Delivered HR analytics dashboards with Chart.js and converted Figma designs into responsive Tailwind CSS interfaces integrated with Spring Boot APIs

Tech Stack: *React.js, JavaScript, Tailwind CSS, Redux Toolkit, Chart.js, Spring Boot, MySQL, Figma, Git*

Trello Clone — Kanban Task Manager **Jun – Jul 2025**

- Built a fully functional Kanban board on Next.js App Router with Server and Client Components, featuring drag-and-drop task/column management using React DnD and React Flow
- Integrated Supabase for real-time database sync and Clerk for secure authentication; implemented board creation and task CRUD operations with TypeScript

Tech Stack: *Next.js (App Router), TypeScript, React DnD, Clerk, Tailwind CSS, ShadcnUI, Supabase*

JournNew — Mood Journal Application **Apr – May 2025**

- Developed a mood-tracking journal on Next.js with dynamic Recharts visualisations for trend analysis; deployed on Vercel with a CI/CD pipeline
- Integrated Clerk authentication, NeonDB for persistent storage, and built an accessible, responsive UI with Tailwind CSS and optimized page metadata for SEO

Tech Stack: *Next.js, TypeScript, Recharts, Clerk, NeonDB, ShadcnUI, Tailwind CSS*

BestBudget — Personal Finance Application

- Built core modules including OTP login, JWT API security, and financial data visualisations using Chart.js (Pie, Doughnut, Bar, Time-Series)

Tech Stack: *React.js, JavaScript, Node.js, Express.js, MongoDB, Chart.js, Figma*

EDUCATION

B.Tech in Computer Science Engineering Aug 2016 – Jul 2020

Indian Institute of Information Technology, Dharwad, Karnataka

CERTIFICATIONS

- Next.js App Router Fundamentals — Vercel
- Frontend Developer (React) — HackerRank
- React (Basic) — HackerRank
